Process Safety Management Approved Courses

Course duration – 1 day

Process Safety Awareness

What is it?

Process Safety Awareness has been developed to provide anyone involved in a role which does not have direct line responsibility for Process Safety with a basic understanding of the principles of Process Safety and how this fits with, but is different to Occupational Safety.

It will allow participants to prepare and to learn how to operate safely within the industry that they work and understand the important role they will play in preventing incidents from occurring. As well as the basic principles and awareness of Process Safety, this course will cover the implications if an accident was to occur on site, using real examples and workshop activity.

It will cover the basics of the industry standards set by the Process Safety Management Competence Programme Board PSMCPB* for which Cogent Skills is the delivery partner.

Who should attend?

The course is aimed at Apprentices and non Process Safety staff working within the Science and High Hazard Industries. It could also be suitable for new staff or contractors working on High Hazard sites as an introduction to the basic principles of Process Safety.

How is it delivered?

Option 1 – PSA Course

The 1 day course can be delivered directly to your staff by one of our highly experienced delivery partners who is an expert in delivering Process Safety training. It can be delivered on site or at an alternative venue. Open courses are also available.

Option 2 – PSA Licence

Alternatively we can offer a Process Safety Awareness licence to train your trainer to deliver Process Safety Awareness to your workforce. The train the trainer course will be 2 days on your site for up to 8 trainers. If you already have a licensed PSMO trainer, we can cover the introduction to PSA and the assessment over one day.

Companies purchase an annual licence and the train the trainer course, then pay a minimal licence fee for the individual packs.

The train the trainer course is delivered by a highly experienced training specialist who is an expert in embedding process safety into training.

Whichever option is taken, PSA delegates will undertake an end assessment and receive a Cogent certificate after the course has been delivered, which can be used to demonstrate their achievement.

The Process Safety Management Competence Programme Board (PSMCPB*) incorporates a number of significant UK and international employers from the high hazard industries as well as academics and regulatory authorities.

How do I get involved?

Call Cogent Skills today on **01325 740900** or email industry@cogentskills.com to register your interest. We will work with you to agree a suitable time to deliver the course.

What will I learn?

On completion of this course participants will:

- Understand the basics of Health and Safety legislation in High Hazard Industries
- Understand the Principles and Control Measures and what we can do to keep barriers strong
- Be aware of the Principles of Process Safety and how this fits with Occupational Safety
- Be aware of Hazard and Risk identification measures
- Be aware of what can happen when we get Process Safety wrong
- Understand the role of 'Emergency Response' in Process Safety Management
- Have an understanding of what mitigation is and awareness of available mitigation measures

Option 1 Direct Delivery price

- In-house course** £2250 +VAT
For up to 12 delegates including end assessment.
- Open course** £300 +VAT
Per delegate including end assessment.

What are the benefits?

- The course will allow you to instil fundamental process safety awareness to all of your workforce industry apprentices starting out their career
- Create a basis of process safety across the business allowing all employees to share a common language across the site
- Participants will be able to identify in practical terms how process safety relates to their role at your site
- Participants will also develop an understanding of mitigation measures that could be identified for particular impacts
- The PSA course is based on the industry standards set by the Process Safety Management Competence Programme Board

Option 2 Licence price

Companies purchase an annual licence and then train the trainer course. Price depends on the number of trainers. **See table below.** Companies then pay a licence fee for the packs and online tests for each delegate who goes through the PSA course.

Number of delegates	up to 2	3 or 4	5 or 6	7 or 8
2 day Train the trainer course	£2,500	£3,200	£3,900	£4,600
Plus Licence for year 1	£500	£500	£500	£500
Standard Pack price – including assessment	£45 per pack			
1 day train the trainer course* (Pack price and licences as above)	£1,400	£2,100	£2,800	£3,500
Annual licence after yr1	£250	£250	£250	£250
Annual trainer licence	£250 per trainer			

* For PSMO licensed trainers

All prices displayed exclude VAT

Developed by industry, the course also meets the learning need for Process Safety in the new apprenticeship training standards for both the Manufacturing and Maintenance Technicians.
