WHAT IS THE CYBER STARS INITIATIVE

THE CYBER STARS INITIATIVE INVOLVES QUALIFYING A CHOSEN MEMBER OF STAFF FROM WITHIN EACH DEPARTMENT TO ACT AS A CYBER SECURITY REPRESENTATIVE.

THIS PROCESS HAS BEEN APPLIED TO SATISFY HEALTH AND SAFETY, FIRST AID AND EQUALITY REQUIREMENTS FOR MANY YEARS. THE NEED IS LONG OVERDUE TO APPLY THE SAME PRINCIPLES TO CYBER SECURITY.

CYBER@INTQUAL-PRO.COM

Cyber Security is the single greatest threat to many UK businesses. Whilst investment in robust IT infrastructure is critical, cyber security awareness and the personal confidence to apply cyber security policies is equally as essential. Proposed changes to EU legislation could mean that the cost of a cyber-attack on your businesses is higher than ever.

Whilst most organisations will undertake some form of cyber security training, responsibility often sits with specific IT associated staff. The Cyber Stars Initiative is about empowering those individuals without an IT or cyber background within the wider organisation, by offering them an opportunity for professional development. Cyber Stars encourages a culture of personal responsibility for organisational cyber security.

CYBER STARS WILL UNDERTAKE THE **PROQUAL LEVEL 2 AWARD IN CYBER SECURITY AWARENESS FOR BUSINESS**

Through the achievement of a nationally recognised qualification, an individual must prove that they understand the range of threats and can perform the appropriate tasks when the time is right.

The responsibilities of a Cyber Star go beyond an increased personal understanding of cyber security. A Cyber Star is responsible for ensuring that good cyber security is adhered to within their workplace, educating colleagues and peers to specific threats. By qualifying a team

of Cyber Stars, you are best placed to ensure sustainable security awareness and better still, a workforce that takes personal responsibility for cyber security.

On completion of their qualification, Cyber Stars will be offered access to the Cyber Stars Portal; on which industry experts share time sensitive cyber security information and threats. This ensures that you are best placed to adapt with an ever changing cyber threat landscape and minimise the risk to your organisation.

WHAT CAN A CYBER STAR DO?

IDENTIFY CURRENT CYBER RISKS SPECIFIC TO YOUR BUSINESS

EDUCATE COLLEAGUES ON A RANGE OF CYBER SECURITY ISSUES TO INCLUDE ACCESS MANAGEMENT, END POINT SECURITY AND THE SAFE USE OF SOCIAL MEDIA.

- **Identify security risks** specific to WiFi zones and their usage.

CYBER@INTQUAL-PRO.COM

- **Assist in the implementation** of effective cyber incident response procedures
- **Ensure that colleagues are updated** with the latest cyber security threats, legislation and best practice.
- **Act as a point of contact** for the implementation of safe mobile and home working policies.
- **Provide a business wide network** of qualified cyber security professionals with the knowledge to implement effective cyber security policies, assisting with both legislative and ISO 27001 compliance.

HOW ARE CYBER STARS QUALIFIED?

ALL CYBER STARS WILL BE GIVEN THE OPPORTUNITY TO ACHIEVE THE PROQUAL LEVEL 2 AWARD IN CYBER SECURITY AWARENESS FOR BUSINESS.

THE CYBER STARS PROGRAMME IS DELIVERED USING AN EFFICIENT BLENDED LEARNING PROCESS.

Intqual-pro will deliver a one day essentials workshop in which all key learning points will be covered. These workshops can be delivered on client site or at one of our national training venues.

Following the workshop learners are able to access a range of learning support materials specific to cyber threats. These materials detail methods utilised by cyber criminals and specific associated symptoms. These resources can then be used to increase awareness throughout the rest of the Cyber Stars' area of responsibility.

All Cyber Stars must complete an assessment as proof of knowledge following the training package. Upon successful completion Cyber Stars will, upon request, be provided with access to the Cyber Stars Portal
