This Course is Aimed at

Anyone who needs to understand the principles of health and safety as part of their job. The typical people who would benefit from this course include: Team leaders and supervisors, HR professionals, facilities managers, those working with young people in a training environment.

Overview

This course is a stand-alone elearning module and forms part of a 10 module set that make up the Health and Safety at Work Suite. It will help you to identify the hazards presented by the movement of vehicles in the workplace and the appropriate control measures.

Program Content and Key Areas

Hazards and controls for vehicles

- ✓ Hazards in vehicle operations causing: loss of control and overturning of vehicles, collisions with other vehicles, pedestrians and fixed objects

Control measures:

- ✓ Safe traffic routes and safety signage, management of vehicle movements, environmental factors (e.g. visibility, gradients, changes of level, surface conditions), maintenance of vehicles, driver protection and restraint systems, means of segregating pedestrians and vehicles, protective measures for people and structures (e.g. barriers, marking signs, warnings of vehicle approach and reversing), site rules, driver competence

Who is this Module suitable for?

On completion of this module, participants should be able to demonstrate understanding of the content through the application and knowledge to familiar and unfamiliar situations. In particular they should be able to:

- ✓ Identify the hazards presented by the movement of vehicles in the workplace and the appropriate control measures
